Re: *United States vs. Emmitt Martin, et al.*
Cr. No. 2:23-cr-20191-MSN

Dear Counsel:

We write to provide you with our eighth production of discovery in this case. In addition to the materials previously provided to you:

1. Interview reports, documents, and photographs are included with this discovery. Additionally, FBI Supervisory Electronics Engineer Andrew Galotti provided additional information about the synchronized videos previously produced in discovery. Galotti advised that he used Adobe Premiere to synch the videos. He described Adobe Premiere as the sister to Photoshop. Galotti put the two videos on a timeline and used the times on the videos and visual and audio clues to match the videos. This is a manual process, not an automatic one. The synch is not perfect because the videos have different frame rates. The time on the clocks on the two videos are also different because the two clocks are synched to different clocks. Even though the events are synched, the clocks are set to slightly different times. Frames can also drop, which can cause the time to appear off.

2. This production has been placed on USAfx. You should have access today. This evidence is BATES stamped US_00052089–US_00052150. Please let us know if you have any issues accessing these materials.

We will make additional productions of discovery material as needed as trial approaches. Please feel free to contact us at (901) 544-4231 (David) or (202) 616-2430 (Kate) if you have any questions.

Very truly yours,

KEVIN G. RITZ
United States Attorney
